Restriction/Election

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7 and 16-24 are drawn to a truncated thrombomodulin protein derivative.

Group II, claim(s) 8-12 are drawn to a method of generating a purified truncated thrombomodulin derivative.

Group III, claim(s) 13-15 are drawn to a method of site-specific PEGylation of a bioactive protein.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: because Groups I-III encompass a product and two methods. The method of Group II is directed to a method of generating a pure protein thus the objective of the method is to purify the protein, and the method of Group III is directed to PEGylating the protein. Therefore, the objective of

these methods are not geared towards the making and using of the first product *per se*. Under PCT Rule 13.1 applicant is entitled to the first product, method of making and using same. Thus, these inventions are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(l).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
